

AREEBA SADIQ

FRONTEND DEVELOPER

Karachi,Pakistan | areebafreelancer41@gmail.com | <https://github.com/AreebaSadiq23>

SUMMARY

As a web developer, I specialize in building responsive and user-focused web interfaces that meet business objectives efficiently. I translate design and functional requirements into reliable, scalable front-end solutions. Currently enhancing my capabilities in agentic AI to stay aligned with evolving industry trends and future-ready development practices.

TECHNICAL SKILLS

HTML	Pandas	Typescript	Tailwind CSS	react JS
CSS	Bootstrap	Figma	Python	Responsive Design
Javascript	Streamlit	Vercel	NextJS	Git & Github

PROJECTS

E-Commerce-Website

(NextJS & TAILWINDCSS)

I have designed and developed this e-commerce website using Next.js and Tailwind CSS, ensuring a modern UI/UX with full responsiveness. The project is optimized for fast performance and a smooth user experience. It includes product listing, a search feature, a wishlist system, a cart system, and an interactive UI. Additionally, Sanity CMS is integrated for efficient and dynamic content management, making the website scalable and easy to update. This project highlights a powerful, efficient, and user-friendly approach to e-commerce solutions.

RIBUILD-Website

(NextJS & Tailwind CSS)

Building a web app using React and Tailwind CSS is fast and efficient. React helps create interactive UI components, while Tailwind provides utility classes for quick and responsive styling. Together, they make modern web development clean, flexible, and easy to manage.

Seasoned-Hip

(NextJS & Tailwind CSS)

Built Seasoned Hip—a modern, fully responsive web project using Next.js and Tailwind CSS, with special focus on seamless user experience, clean UI, and optimized performance across all devices.

Personal Portfolio

(NextJS & Tailwind CSS)

Developed a personal portfolio using React, Tailwind CSS, and Framer Motion—fully responsive with smooth animations and an interactive, modern UI to showcase projects and skills.

EXPERIENCE

Frontend Developer

The Visual Chees – Remote

Built responsive, fast, and user-friendly websites using React and Next.js. Worked closely with the design team to implement clean UI/UX and deliver quality web solutions.
